The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Higuchi et al (US 2005/0239990, having an effective filing date of 12-20-2004) disclose a curable composition for optical waveguides comprising a carboxyl group-containing urethane compound, a polymerizable unsaturated compound a compound containing two or more ring opening functional groups and a radiation polymerizable initiator. See the description of the carboxyl group-containing urethane in paragraphs [0037] to [0051]. Addition of a solvent is taught in the Examples, for example in paragraph [0175]. The softening temperature of 0° C to 80° C is taught in paragraph [0074]. The waveguide constitution is taught in paragraph [0084].

Applicant has provided a certified translation of PCT/JP2005/003209 having a filing date of 2/25/2005. Applicant claims priority to Japanese Application 2004-49826 filed 2/25/2004. A certified translation of the Japanese Application is required to establish as earlier filing date than 12-20-2004 for the instantly claimed invention.

Claims 1-7 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 20003-113221. J '221 discloses a composition comprising a diluent and a urethane oligomer

obtained by reaction of components corresponding to the instantly recited components as follows: J'221 (e) to applicant's (b), J '221 (f) to applicant's (a), J '221 (g) to the polyol set forth in instant claim 7 and J '221 (d) to applicant's (c), a compound containing a hydroxyl group and an unsaturated group.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The disclosures of JP 2003-155320, JP 2003-268067 and JP 2001-033959 are considered to be cumulative of JP 2003-113221.
